Multimodal mobility – opportunities and challenges for our public transport system”
with Sylvia Lier – TAF mobile GmbH

DRINKS & FLYING CATERING THROUGHOUT THE EVENT

ENTRY
Register here to attend the event. Access with valid InnoTrans ticket only. The event is held in English.
WE CHANGE MOBILITY

Mobility is a human right, it is crucial for social participation and is a key component of public services. Since its inception in 2015, Women in Mobility has been advocating for a more inclusive and feminist approach to the transport and mobility sector, incorporating diverse perspectives.

Prioritising accessibility, security, and sustainability is essential when developing new projects or upgrading existing infrastructure and public spaces. This enhances the appeal and availability of walking, cycling, public transport, and shared (micro) mobility. Everyone benefits from transport systems that prioritise safety, accessibility, and equal opportunities.

#LetsChangeMobility

"The lack of women in the transport sector not only means that the design of transport services risks to fail to adequately consider the needs of female users. It also means that we are not benefiting from the entire talent pool. I am very much committed to attracting more people to a career in rail, and to fostering diversity and inclusivity in the transport sector as a whole.

MAGDA KOPCZYŃSKA
Director-General for Mobility and Transport, European Commission
Diverse teams are more innovative and creative – and that's exactly what we need for the sustainable mobility of the future. To us, this means that we need to attract more women to the STEM sector. They are the key to a future-proof Deutsche Bahn.

KERSTIN WAGNER
Deutsche Bahn AG, Executive Vice President Talent Acquisition
